

Nomis Price Optimiser makes shortlist

The Nomis Price Optimiser is one of three finalists in the "Most Innovative New Product" category for the European Banking Technology Readers' Choice Award, says [eMediaWire](#).

The Readers' Choice Awards were created to recognise that financial institutions are increasingly turning to independent software providers in search of solutions to address a range of issues that would once have meant an expensive bespoke development.

Banking Technology's readers were asked to vote for their choice of the best systems in a range of categories. The winners in each category, and the runners up, will be announced at the European Banking Technology Awards gala event on 22 November, in London.
